Datasheet for ABIN727132
anti-C-Peptide antibody (Biotin)

Overview

Quantity:	100 µL
Target:	C-Peptide
Reactivity:	Human
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This C-Peptide antibody is conjugated to Biotin
Application:	ELISA, Immunohistochemistry (Paraffin-embedded Sections) (IHC (p)), Immunohistochemistry (Frozen Sections) (IHC (fro))

Product Details

Immunogen:	KLH conjugated synthetic peptide of human C Peptide
Isotype:	IgG
Predicted Reactivity:	Human
Purification:	Purified by Protein A.

Target Details

Target:	C-Peptide
Alternative Name:	C Peptide (C-Peptide Products)
Background:	Synonyms: proinsulin precursor, Hyperproinsulinemia, INS, Insulin Precursor, IRDN, Proinsulin, Propeptide, C-Peptide, INS_HUMAN. Background: C Peptide is part of the molecule of Proinsulin, that consists of three parts: C

Target Details

Peptide and two long strands of amino acids (called the alpha and beta chains) that later become linked together to form the insulin molecule. From every molecule of proinsulin, one molecule of insulin plus one molecule of C Peptide are produced. C peptide is released into the blood stream in equal amounts to insulin. A test of C peptide levels will show how much insulin the body is making. Insulin decreases blood glucose concentration. It increases cell permeability to monosaccharides, amino acids and fatty acids. It accelerates glycolysis, the pentose phosphate cycle, and glycogen synthesis in liver.

Gene ID: 3630

Application Details

Application Notes: IHC-P 1:100-500

Restrictions: For Research Use only

Handling

Format: Liquid

Concentration: 1 µg/µL

Buffer: Aqueous buffered solution containing 0.01M TBS (pH 7.4) with 1 % BSA, 0.03 % Proclin300 and 50 % Glycerol.

Preservative: Sodium azide

Precaution of Use: This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only.

Storage: -20 °C

Storage Comment: Store at -20°C for 12 months.

Expiry Date: 12 months
