Target Details

Target:	SARS-CoV NSP3
Alternative Name:	PLpro (SARS-CoV NSP3 Products)

Target Details

Target Type:	Viral Protein
Background:	The coronaviral proteases, papain-like protease (PLpro) and 3C-like protease (3CLpro), are attractive antiviral drug targets because they are essential for coronaviral replication. Although the primary function of PLpro and 3CLpro are to process the viral polyprotein in a coordinated manner, PLpro has the additional function of stripping ubiquitin and ISG15 from host-cell proteins to aid coronaviruses in their evasion of the host innate immune responses.
Molecular Weight:	38.6 kDa same as Tris-Bis PAGE result.
UniProt:	P0C6U8
