### Overview

Quantity:	100 μg
Target:	KLRG1
Reactivity:	Mouse
Host:	Golden Syrian Hamster
Clonality:	Monoclonal
Conjugate:	This KLRG1 antibody is conjugated to APC
Application:	Flow Cytometry (FACS)
Product Details	
Product Details Clone:	2F1
	2F1 IgG
Clone:	
Clone: Isotype:	IgG
Clone: Isotype:	lgG  This monoclonal antibody was purified from tissue culture supernatant via affinity

# Target Details

Target:	KLRG1	
Alternative Name:	KLRG1 (KLRG1 Products)	
Background:	The 2F1 antibody reacts with mouse KLRG1 (Killer cell Lectin-like Receptor G1). This 30-38 kDa	
	homodimeric receptor may be expressed by activated, mature NK cells and by	

effector/memory T cells, with potentially different roles in each cell type. KLRG1 can regulate, in an inhibitory fashion, the development and effector functions of NK cells, and is often cited as a senescence or terminal differentiation marker for T cells. Ligands for KLRG1 include members of the cadherin family of adhesion molecules, specifically N-Cadherin, E-Cadherin, and R-Cadherin. These interactions may induce bidirectional, immunosuppressive signaling in both KLRG- and Cadherin-expressing cells. A more recently identified role for KLRG1-Cadherin signaling in tissue organization, e.g. in cardiac angiogenesis, expands the function of these interactions beyond immunosuppression of immune cells. (Bouchentouf et al. 2010. J. Immunol. 185: 7014-7025). The 2F1 antibody may be used as a phenotypic marker for KLRG1 in mouse, frequently in combination with Anti-Mouse CD127 antibody (clone A7R34), for identification of effector T cell populations.

Gene ID:

50928

UniProt:

088713

# **Application Details**

$\Lambda$ nn	lication	MOTOC:
ADD	IICALIOLE	TAUTES.

This antibody preparation has been quality-tested for flow cytometry using mouse spleen cells, or an appropriate cell type (where indi- cated). The amount of antibody required for optimal staining of a cell sample should be determined empirically in your system.

Comment:

0.2 mg/mL

Restrictions:

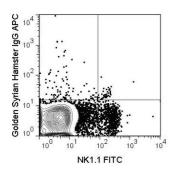

For Research Use only

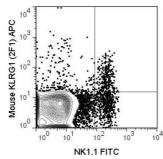

# Handling

Buffer:	10 mM NaH2PO4, 150 mM NaCl, 0.09 % Sodium azide, 0.1 % gelatin, pH 7.2	
Preservative:	Sodium azide	
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.	
Storage:	4 °C	
Storage Comment:	2-8°C protected from light	

**Expiry Date:** 

12 months

# Flow Cytometry

**Image 1.** C57BI/6 splenocytes were stained with FITC Anti-Mouse NK1.1 (ABIN6961263) and 0.06  $\mu$ g APC Anti-Mouse KLRG1 (ABIN6961263) (right panel) or 0.06  $\mu$ g APC Golden Syrian Hamster IgG (left panel).
