# Datasheet for ABIN7278222 anti-TCR beta antibody (FITC)

Image

#### Overview

Quantity:	100 µg
Target:	TCR beta
Reactivity:	Mouse
Host:	Armenian Hamster
Clonality:	Monoclonal
Conjugate:	This TCR beta antibody is conjugated to FITC
Application:	Flow Cytometry (FACS)

## Product Details

Clone:	H57-597
lsotype:	lgG
Purification:	This monoclonal antibody was purified from tissue culture supernatant via affinity
	chromatography. The purified antibody was conjugated under optimal conditions, with
	unreacted dye removed from the preparation. It is recommended to store the product undiluted
	at 4°C, and protected from prolonged exposure to light. Do not freeze.

## Target Details

Target:	TCR beta
Alternative Name:	TCR beta (TCR beta Products)
Background:	The H57-597 antibody is specific for the beta chain of the mouse T cell Receptor (TCR). This cell surface protein combines with a second protein chain (alpha chain) to form the alpha-beta

	TCR that is expressed by NK1.1+ thymocytes, NKT cells, and the majority of peripheral T cells.
	A small number of T cells may express an alternative heteromer of gamma and delta protein
	chains, known as the gamma-delta TCR. These receptors participate in a complex with CD3,
	and with the co-receptors CD4 or CD8, to recognize and respond to antigens bound to MHC
	molecules on antigen-presenting cells. Such interactions promote T cell receptor signaling (T
	cell activation) and can re- sult in a number of cellular responses including proliferation,
	differentiation, production of cytokines or activation-induced cell death. The H57-597 antibody is
	used as a phenotypic marker for T cells expressing the alpha-beta TCR. It is also widely used to
	cross-link surface TCR and thereby mimic TCR-mediated cell activation or induction of
	apoptosis. The antibody does not cross-react with cells expressing the gamma-delta TCR.
Gene ID:	21577
Application Details	
Application Notes:	This antibody preparation has been quality-tested for flow cytometry using mouse spleen cells,
	or an appropriate cell type (where indi- cated). The amount of antibody required for optimal
	staining of a cell sample should be determined empirically in your system.
Comment:	0.5 mg/mL 0 100 101 102 103 104 Mouse TCR beta (H57-597) FITC
Restrictions:	For Research Use only
Handling	
Buffer:	10 mM NaH2PO4, 150 mM NaCl, 0.09 % Sodium azide, 0.1 % gelatin, pH 7.2
Preservative:	Sodium azide
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which
	should be handled by trained staff only.
Storage:	4 °C
Storage Comment:	2-8°C protected from light
Expiry Date:	12 months

Mouse TCR beta (H57-597) FITC

#### **Flow Cytometry**

**Image 1.** C57BI/6 splenocytes were stained with 0.25  $\mu$ g Anti-Mouse TCR beta FITC (ABIN6961422) (solid line) or 0.25  $\mu$ g Armenian hamster IgG FITC isotype control (dashed line).
