## Target Details

Aortic carboxypeptidase like protein ACLP,Aortic carboxypeptidase like protein, FLJ33612, AEBP1\_HUMAN, Adipocyte enhancer-binding protein 1, AE-binding protein 1, Aortic carboxypeptidase-like protein.

Background: This gene encodes a member of carboxypeptidase A protein family. The encoded protein may function as a transcriptional repressor and play a role in adipogenesis and smooth muscle cell differentiation. Studies in mice suggest that this gene functions in wound healing and abdominal wall development. Overexpression of this gene is associated with glioblastoma. [provided by RefSeq, May 2013].
