Datasheet for ABIN728878 anti-GLP-2 antibody (AA 146-178)

Image

Overview

Quantity:	100 µL
Target:	GLP-2
Binding Specificity:	AA 146-178
Reactivity:	Rat
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This GLP-2 antibody is un-conjugated
Application:	Western Blotting (WB), Immunofluorescence (Cultured Cells) (IF (cc)), Immunofluorescence (Paraffin-embedded Sections) (IF (p)), ELISA, Immunohistochemistry (Frozen Sections) (IHC (fro)), Immunohistochemistry (Paraffin-embedded Sections) (IHC (p))

Product Details

Immunogen:	KLH conjugated synthetic peptide derived from human GLP-2
lsotype:	IgG
Cross-Reactivity:	Rat
Predicted Reactivity:	Human,Mouse,Dog,Cow,Sheep,Pig
Purification:	Purified by Protein A.
Torget Details	
Target Details	
Target:	GLP-2

Target Details	
Alternative Name:	GLP-2 (GLP-2 Products)
Background:	Synonyms: GLP1, GLP2, GRPP, Glucagon, GCG
	Background: Glucagon plays a key role in glucose metabolism and homeostasis. Regulates
	blood glucose by increasing gluconeogenesis and decreasing glycolysis. A counterregulatory
	hormone of insulin, raises plasma glucose levels in response to insulin-induced hypoglycemia.
	Plays an important role in initiating and maintaining hyperglycemic conditions in diabetes. GLP-
	1 is a potent stimulator of glucose-dependent insulin release. Play important roles on gastric
	motility and the suppression of plasma glucagon levels. May be involved in the suppression of
	satiety and stimulation of glucose disposal in peripheral tissues, independent of the actions of
	insulin. Have growth-promoting activities on intestinal epithelium. May also regulate the
	hypothalamic pituitary axis (HPA) via effects on LH, TSH, CRH, oxytocin, and vasopressin
	secretion. Increases islet mass through stimulation of islet neogenesis and pancreatic beta cell
	proliferation. Inhibits beta cell apoptosis. GLP-2 stimulates intestinal growth and up-regulates
	villus height in the small intestine, concomitant with increased crypt cell proliferation and
	decreased enterocyte apoptosis. The gastrointestinal tract, from the stomach to the colon is
	the principal target for GLP-2 action. Plays a key role in nutrient homeostasis, enhancing
	nutrient assimilation through enhanced gastrointestinal function, as well as increasing nutrient
	disposal. Stimulates intestinal glucose transport and decreases mucosal permeability.
	Oxyntomodulin significantly reduces food intake. Inhibits gastric emptying in humans.
	Suppression of gastric emptying may lead to increased gastric distension, which may
	contribute to satiety by causing a sensation of fullness. Glicentin may modulate gastric acid
	secretion and the gastro-pyloro-duodenal activity. May play an important role in intestinal
	mucosal growth in the early period of life.
Gene ID:	2641
UniProt:	P01275
Application Details	
Application Notes:	WB 1:300-5000
	ELISA 1:500-1000

Application Details	
---------------------	--

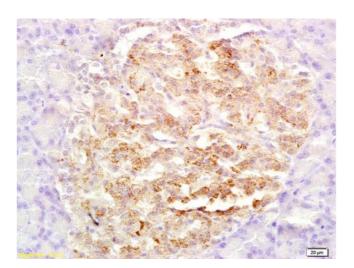

Restrictions:

For Research Use only

Handling

Format:	Liquid
Concentration:	1 μg/μL
Buffer:	0.01M TBS(pH 7.4) with 1 % BSA, 0.02 % Proclin300 and 50 % Glycerol.
Preservative:	ProClin
Precaution of Use:	This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only.
Storage:	4 °C,-20 °C
Storage Comment:	Shipped at 4°C. Store at -20°C for one year. Avoid repeated freeze/thaw cycles.
Expiry Date:	12 months
