## Datasheet for ABIN729628 anti-Indole 3 Acetic Acid antibody

Image

#### Overview

| Quantity:    | 100 µL  |
|--------------|---|
| Target:      | Indole 3 Acetic Acid (IAA)  |
| Reactivity:  | Please inquire  |
| Host:        | Rabbit  |
| Clonality:   | Polyclonal  |
| Conjugate:   | This Indole 3 Acetic Acid antibody is un-conjugated   |
| Application: | Immunofluorescence (Paraffin-embedded Sections) (IF (p)), Immunofluorescence (Cultured<br>Cells) (IF (cc)), ELISA, Immunohistochemistry (Frozen Sections) (IHC (fro)),<br>Immunohistochemistry (Paraffin-embedded Sections) (IHC (p)) |

### Product Details

| Immunogen:                  | KLH conjugated with IAA |
|-----------------------------|-------------------------|
| Isotype:                    | lgG                     |
| Cross-Reactivity (Details): | Indole-3-Acetic Acid    |
| Purification:               | Purified by Protein A.  |
|                             |                         |

## Target Details

| Target:           | Indole 3 Acetic Acid (IAA) |
|-------------------|----------------------------|
| Alternative Name: | IAA (IAA Products)         |
| Target Type:      | Chemical                   |

## Target Details

| Background: | Synonyms: Indole-3-Acetic Acid, indole-3-acetic acid_indol- yl-3-acetic acid.                     |
|-------------|---|
|             | Background: Indole-3-acetic acid, also known as IAA, is a heterocyclic compound that is an        |
|             | phytohormones called auxins. This colourless solid is probably the most important plant auxin.    |
|             | The molecule is derived from indole, containing a carboxymethyl group (acetic acid). IAA has      |
|             | many different effects, as all auxins do, such as inducing cell elongation and cell division with |
|             | all subsequent results for plant growth and development. There are less expensive and             |
|             | metabolically stable synthetic auxin analogs on the market for use in horticulture, such as       |
|             | indole-3-butyric acid (IBA) and 1-naphthaleneacetic acid (NAA).                                   |

## Application Details

| Application Notes: | IHC-P 1:100-500   |
|--------------------|---|
|                    | IF(IHC-P) 1:50-200  |
| Restrictions:      | For Research Use only   |
| Handling           |   |
| Format:            | Liquid  |
| Concentration:     | 1 µg/µL   |
| Buffer:            | 0.01M TBS( pH 7.4) with 1 % BSA, 0.02 % Proclin300 and 50 % Glycerol.   |
| Preservative:      | Sodium azide  |
| Precaution of Use: | This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only. |
| Storage:           | 4 °C,-20 °C   |
| Storage Comment:   | Shipped at 4°C. Store at -20°C for one year. Avoid repeated freeze/thaw cycles.   |
| Expiry Date:       | 12 months   |
