## Overview

|                      |                                                   |
|----------------------|---------------------------------------------------|
| Quantity:            | 100 µL                                            |
| Target:              | GTF3C3                                            |
| Binding Specificity: | N-Term                                            |
| Reactivity:          | Human, Mouse, Rat                                 |
| Host:                | Rabbit                                            |
| Clonality:           | Polyclonal                                        |
| Conjugate:           | This GTF3C3 antibody is un-conjugated             |
| Application:         | Western Blotting (WB), Immunohistochemistry (IHC) |

## Product Details

|                  |                                                                                                    |
|------------------|----------------------------------------------------------------------------------------------------|
| Immunogen:       | KLH-conjugated synthetic peptide encompassing a sequence within the N-term region of human GTF3C3. |
| Specificity:     | Recognizes endogenous levels of GTF3C3 protein.                                                    |
| Characteristics: | Rabbit polyclonal antibody to GTF3C3                                                               |
| Purification:    | The antibody was purified by immunogen affinity chromatography.                                    |

## Target Details

|                   |                                                                                                 |
|-------------------|-------------------------------------------------------------------------------------------------|
| Target:           | GTF3C3                                                                                          |
| Alternative Name: | GTF3C3 ( <a href="#">GTF3C3 Products</a> )                                                      |
| Background:       | General transcription factor 3C polypeptide 3, Transcription factor IIIC 102 kDa subunit, TFIIC |

## Target Details

|          |                                                                                 |
|----------|---------------------------------------------------------------------------------|
|          | 102 kDa subunit, TFIIIC102, Transcription factor IIIC subunit gamma, TF3C-gamma |
| Gene ID: | 9330                                                                            |
| UniProt: | <a href="#">Q9Y5Q9</a>                                                          |

## Application Details

|                    |                                         |
|--------------------|-----------------------------------------|
| Application Notes: | WB (1:500 - 1:1000), IH (1:100 - 1:200) |
| Restrictions:      | For Research Use only                   |

## Handling

|                    |                                                                                                                        |
|--------------------|------------------------------------------------------------------------------------------------------------------------|
| Format:            | Liquid                                                                                                                 |
| Buffer:            | Liquid in 0.42 % Potassium phosphate, 0.87 % Sodium chloride, pH 7.3, 30 % glycerol, and 0.01 % sodium azide.          |
| Preservative:      | Sodium azide                                                                                                           |
| Precaution of Use: | This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only. |
| Storage:           | -20 °C                                                                                                                 |
| Storage Comment:   | Shipped at 4°C. Upon delivery aliquot and store at -20°C for one year. Avoid freeze/thaw cycles.                       |
| Expiry Date:       | 12 months                                                                                                              |

## Images

### Immunohistochemistry

**Image 1.** Immunohistochemical analysis of GTF3C3 staining in human brain formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.

Western Blotting

**Image 2.** Western blot analysis of GTF3C3 expression in HeLa (A) whole cell lysates.
