### 1 Image

#### Overview

|                      |                                             |
|----------------------|---------------------------------------------|
| Quantity:            | 100 µL                                      |
| Target:              | BAMBI                                       |
| Binding Specificity: | Center                                      |
| Reactivity:          | Human, Rat, Mouse, Dog, Cow, Chicken, Sheep |
| Host:                | Rabbit                                      |
| Clonality:           | Polyclonal                                  |
| Conjugate:           | This BAMBI antibody is un-conjugated        |
| Application:         | Western Blotting (WB)                       |

#### Product Details

|                  |                                                                                                   |
|------------------|---------------------------------------------------------------------------------------------------|
| Immunogen:       | KLH-conjugated synthetic peptide encompassing a sequence within the center region of human BAMBI. |
| Specificity:     | Recognizes endogenous levels of BAMBI protein.                                                    |
| Characteristics: | Rabbit polyclonal antibody to BAMBI                                                               |
| Purification:    | The antibody was purified by immunogen affinity chromatography.                                   |

#### Target Details

|                   |                                                                                       |
|-------------------|---------------------------------------------------------------------------------------|
| Target:           | BAMBI                                                                                 |
| Alternative Name: | BAMBI ( <a href="#">BAMBI Products</a> )                                              |
| Background:       | NMA, BMP and activin membrane-bound inhibitor homolog, Non-metastatic gene A protein, |

Target Details

|          |                                                                          |
|----------|--------------------------------------------------------------------------|
|          | Putative transmembrane protein NMA                                       |
| Gene ID: | 25805, 68010, 83837                                                      |
| UniProt: | <a href="#">Q13145</a> , <a href="#">Q9D0L6</a> , <a href="#">Q91XN4</a> |

Application Details

|                    |                       |
|--------------------|-----------------------|
| Application Notes: | WB (1:500 - 1:1000)   |
| Restrictions:      | For Research Use only |

Handling

|                    |                                                                                                                        |
|--------------------|------------------------------------------------------------------------------------------------------------------------|
| Format:            | Liquid                                                                                                                 |
| Buffer:            | Liquid in 0.42 % Potassium phosphate, 0.87 % Sodium chloride, pH 7.3, 30 % glycerol, and 0.01 % sodium azide.          |
| Preservative:      | Sodium azide                                                                                                           |
| Precaution of Use: | This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only. |
| Storage:           | -20 °C                                                                                                                 |
| Storage Comment:   | Shipped at 4°C. Upon delivery aliquot and store at -20°C for one year. Avoid freeze/thaw cycles.                       |
| Expiry Date:       | 12 months                                                                                                              |
