### Immunohistochemistry

**Image 1.** Immunohistochemical analysis of ERCC6 staining in human lung cancer formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with

haematoxylin and mounted with DPX.

Western Blotting

**Image 2.** Western blot analysis of ERCC6 expression in HeLa (A), Raw264.7 (B), H9C2 (C) whole cell lysates.
