Datasheet for ABIN7317192 Annexin VIII Protein (His tag)

Overview

Quantity:	100 µg
Target:	Annexin VIII (ANXA8)
Origin:	Human
Source:	Escherichia coli (E. coli)
Protein Type:	Recombinant
Purification tag / Conjugate:	This Annexin VIII protein is labelled with His tag.

Product Details

Purpose:	Recombinant Human Annexin A8/ANXA8 Protein (His Tag)
Sequence:	Met 1-Pro327
Characteristics:	A DNA sequence encoding the human ANXA8 (AAH73755.1) (Met1-Pro327) was expressed with a polyhistidine tag at the N-terminus.
Purity:	> 95 % as determined by reducing SDS-PAGE.

Target Details

Target:	Annexin VIII (ANXA8)
Alternative Name:	Annexin A8/ANXA8 (ANXA8 Products)
Background:	Background: DPEP2 (MBD-2) belongs to the membrane-bound dipeptidase family. There are three members of this family as membrane-bound dipeptidase-1 (MBD-1), membrane-bound dipeptidase-2 (MBD-2) and membrane-bound dipeptidase-3 (MBD-3). MBD-2 is expressed at highest levels in lung, heart, and testis and at some what lower levels in spleen. MBD-2 is

Target Details

membrane-bound through a glycosylphosphatidyl-inositol linkage and probably is a metalloprotease which hydrolyzes leukotriene D4 (LTD4) into leukotriene E4 (LTE4). It is generally recognized that rapid cleavage of LTD4 is important in inactivating the broncho- and vaso-constrictive effects of cysteinyl LTs in asthmatic and inflammatory processes.

Synonym: Annexin A8, Annexin VIII, Annexin-8, Vascular Anticoagulant-Beta, VAC-Beta, ANXA8, ANX8

Molecular Weight:	39.1 kDa
-------------------	----------

Application Details

Restrictions:	For Research Use only
---------------	-----------------------

Handling

Format:	Lyophilized
---------	-------------

Reconstitution:	Please refer to the printed manual for detailed information.
-----------------	--

Buffer:	Lyophilized from sterile PBS, pH 7.4
---------	--------------------------------------

Storage:	4 °C, -20 °C, -80 °C
----------	----------------------

Storage Comment:	Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of reconstituted samples are stable at < -20°C for 3 months.
