

Datasheet for ABIN7317217

SRGN Protein (MYC tag,His tag)[Go to Product page](#)

Overview

Quantity:	100 µg
Target:	SRGN
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This SRGN protein is labelled with MYC tag,His tag.

Product Details

Purpose:	Recombinant Human Serglycin/SRGN Protein (His&Myc Tag)
Sequence:	Met 1-Leu158
Characteristics:	A DNA sequence encoding the human SRGN (Met1-Leu158) was fused with the C-terminal polyhistidine-tagged myc at the C-terminus.
Purity:	> 90 % as determined by reducing SDS-PAGE.
Endotoxin Level:	< 1.0 EU per µg as determined by the LAL method.

Target Details

Target:	SRGN
Alternative Name:	Serglycin/SRGN (SRGN Products)
Background:	Background: SRGN is known as a hematopoietic cell granule proteoglycan. Proteoglycans stored in the secretory granules of various hematopoietic cells has a protease-resistant peptide core, and is vital for neutralizing hydrolytic enzymes. SRGN is associated with the

Target Details

macromolecular complex of granzymes and perforin, which may serve as a mediator of granule-mediated apoptosis. It is required for storage of some proteases in both connective tissue and mucosal mast cells and for storage of granzyme B in T-lymphocytes. SRGN also plays a role in localizing neutrophil elastase in azurophil granules of neutrophils.

Synonym: PPG,PRG,PRG1

Molecular Weight:	17.3 kDa
Pathways:	Maintenance of Protein Location

Application Details

Restrictions:	For Research Use only
---------------	-----------------------

Handling

Format:	Lyophilized
Reconstitution:	Please refer to the printed manual for detailed information.
Buffer:	Lyophilized from sterile PBS, pH 7.4
Storage:	4 °C,-20 °C,-80 °C
Storage Comment:	Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of reconstituted samples are stable at < -20°C for 3 months.
