Datasheet for ABIN7317824 TCN2 Protein (His tag)

Overview

Quantity:	50 µg
Target:	TCN2
Origin:	Human
Source:	CHO Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This TCN2 protein is labelled with His tag.

Product Details

Purpose:	Recombinant Human TCN2 Protein (His Tag)
Sequence:	Met 1-Trp 427
Characteristics:	A DNA sequence encoding the human TCN2 (NP_000346.2) (Met 1-Trp 427) was expressed with a C-terminal polyhistidine tag.
Purity:	> 90 % as determined by reducing SDS-PAGE.
Endotoxin Level:	< 1.0 EU per µg as determined by the LAL method.

Target Details

Target:	TCN2
Alternative Name:	TCN2 (TCN2 Products)
Background:	Background: Transcobalamin II, also known as TCN2 and TC II, is a plasma protein that binds cobalamin (Cbl, vitamin B12) as it is absorbed in the terminal ileum and distributes to tissues. The circulating transcobalamin II-cobalamin complex binds to receptors on the plasma

Target Details

membrane of tissue cells and is then internalized by receptor-mediated endocytosis.

Transcobalamin II is a non-glycosylated secretory protein of molecular mass 43 kDa. Its plasma membrane receptor (TC II-R) is a heavily glycosylated protein with a monomeric molecular mass of 62 kDa. Human TCN2 gene is composed of nine exons and eight introns spanning approximately 20 kb with multiple potential transcription start sites. A number of genetic abnormalities are characterized either by a failure to express TCN2 or by synthesis of an abnormal protein. The TCN2 deficiency results in cellular cobalamin deficiency, an early onset of megaloblastic anaemia, and neurological abnormalities.

Synonym: Transcobalamin-II,D22S676,D22S750,II,TC,TC-2,TC2,TCII

Molecular Weight:	46.7 kDa
-------------------	----------

NCBI Accession:	NP_000346
-----------------	---------------------------

Application Details

Restrictions:	For Research Use only
---------------	-----------------------

Handling

Format:	Lyophilized
---------	-------------

Reconstitution:	Please refer to the printed manual for detailed information.
-----------------	--

Buffer:	Lyophilized from sterile PBS, pH 7.4
---------	--------------------------------------

Storage:	4 °C,-20 °C,-80 °C
----------	--------------------

Storage Comment:	Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of reconstituted samples are stable at < -20°C for 3 months.
