Datasheet for ABIN7320062 MOG Protein (AA 30-149) (His tag)

Overview	
Quantity:	100 µg
Target:	MOG
Protein Characteristics:	AA 30-149
Origin:	Mouse
Source:	Escherichia coli (E. coli)
Protein Type:	Recombinant
Purification tag / Conjugate:	This MOG protein is labelled with His tag.

Product Details

Purpose:	Recombinant Mouse MOG Protein (aa30-149, His Tag)
Sequence:	Gly 29-Thr 156
Characteristics:	A DNA sequence encoding the mouse MOG (Q61885) extracellular domain (Gly 29-Thr 156) was expressed, with a C-terminal polyhistidine tag.
Purity:	> 97 % as determined by SDS-PAGE

Target Details

Target:	MOG
Alternative Name:	MOG (MOG Products)
Background:	Background: Myelin oligodendrocyte glycoprotein (MOG) is a transmembrane protein belonging to immunoglobulin superfamily, and contains an Ig-like domain followed by two potential membrane-spanning regions. MOG is expressed only in the CNS with very low content

	(approximately 0.1 % total proteins) in oligodendrogliocyte membrane. Three possible functions
	for MOG were suggested: (a) a cellular adhesive molecule, (b) a regulator of oligodendrocyte
	microtubule stability, and (c) a mediator of interactions between myelin and the immune
	system, in particular, the complement cascade. A direct interaction might exist between the
	membrane-associated regions of MOG and the myelin-specific glycolipid galactocerebroside
	(Gal-C), and such an interaction may have important consequences regarding the membrane
	topology and function of both molecules. It is considered that MOG is an autoantigen capable
	to produce a demyelinating multiple sclerosis-like disease in experimental animals.
	Synonym: B230317G11Rik
Molecular Weight:	16 kDa
UniProt:	Q61885
Application Details	
Restrictions:	For Research Use only
Handling	
Handling Format:	Lyophilized
-	Lyophilized Please refer to the printed manual for detailed information.
Format:	
Format: Reconstitution:	Please refer to the printed manual for detailed information.
Format: Reconstitution: Buffer:	Please refer to the printed manual for detailed information. Lyophilized from sterile PBS, pH 5.5
Format: Reconstitution: Buffer: Storage:	Please refer to the printed manual for detailed information. Lyophilized from sterile PBS, pH 5.5 4 °C,-20 °C,-80 °C
