Datasheet for ABIN7320812 IL23 Protein (His tag)

1 Image

Overview

Quantity:	50 µg
Target:	IL23
Origin:	Mouse
Source:	Human Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This IL23 protein is labelled with His tag.

Product Details

Purpose:	Recombinant Mouse IL-23/Interleukin-23(IL23A&IL12B) Protein (His Tag)
Sequence:	Val22-Ala196&Met23-Ser335
Characteristics:	Recombinant Mouse Interleukin-23 is produced by our Mammalian expression system and the target gene encoding Val22-Ala196&Met23-Ser335 is expressed with a 6His tag at the C-terminus.
Purity:	> 95 % as determined by reducing SDS-PAGE.
Endotoxin Level:	< 1.0 EU per µg as determined by the LAL method.

Target Details

Target:	IL23
Alternative Name:	IL-23/Interleukin-23 (IL23 Products)
Background:	Background: Interleukin 23 (IL-23) is a heterodimeric cytokine composed of two disulfide-linked subunits, a p19 subunit that is unique to IL-23, and a p40 subunit that is shared with IL-12. The

Target Details

p19 subunit has homology to the p35 subunit of IL-12, as well as to other single chain cytokines such as IL-6 and IL-11. The p40 subunit is homologous to the extracellular domains of the hematopoietic cytokine receptors. Although p19 is expressed by activated macrophages, dendritic cells, T cells, and endothelial cells, only activated macrophages and dendritic cells express p40 concurrently to produce IL-23. IL-23 has biological activities that are similar to, but distinct from IL-12. Both IL-12 and IL-23 induce proliferation and IFN-gamma production by human T cells. While IL-12 acts on both naive and memory human T cells, the effects of IL-23 is restricted to memory T cells.

Synonym: SGRF,IL-23p19,CLMF p40,IL-12 subunit p40,NKSF2

Molecular Weight: 9.7&36.8 kDa

Application Details

Restrictions: For Research Use only

Handling

Format: Lyophilized

Reconstitution: Please refer to the printed manual for detailed information.

Buffer: Lyophilized from a 0.2 µm filtered solution of PBS, pH 7.4.

Storage: 4 °C,-20 °C,-80 °C

Storage Comment: Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of reconstituted samples are stable at < -20°C for 3 months.

Western Blotting
