# Datasheet for ABIN7321137 CNTN3 Protein (Fc Tag)

Image

#### Overview

Quantity:	100 µg
Target:	CNTN3
Origin:	Rat
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This CNTN3 protein is labelled with Fc Tag.

### Product Details

Purpose:	Recombinant Rat Contactin 3/CNTN3 Protein (Fc Tag)
Sequence:	Met1-Gly1001
Characteristics:	A DNA sequence encoding the rat CNTN3 (Met1-Gly1001) was expressed with the Fc region of human IgG1 at the C-terminus.
Purity:	> 85 % as determined by SDS-PAGE
Endotoxin Level:	< 1.0 EU per $\mu$ g of the protein as determined by the LAL method

## Target Details

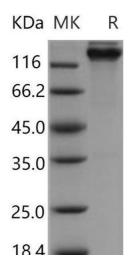

Target:	CNTN3		
Alternative Name:	Contactin 3/CNTN3 (CNTN3 Products)		
Background:	Background: Contactins are a subgroup of molecules belonging to the immunoglobulin superfamily that are expressed exclusively in the nervous system. The subgroup consists of six		
	members: Contactin-1, Contactin-2(TAG-1), Contactin-3(BIG-1), BIG-2, Contactin-5(NB-2) and

	NB-3. Since their identification in the late 1980s, Contactin-1 and Contactin-2 have been studied			
	extensively. Axonal expression and the neurite extension activity of Contactin-1 and Contactin-2			
	attracted researchers to study the function of these molecules in axon guidance during			
	development. Contactin-1 and Contactin-2 have come to be known as the principal molecules			
	in the function and maintenance of myelinated neurons. In contrast, the function of the other			
	four members of this subgroup remained unknown until recently. Contactin-3, also known as			
	CNTN3 ( BIG-1 in rat and PANG in mouse ), is a GPI-linked glycoprotein that is expressed on			
	cerebellar Purkinje cells, amygdaloid and thalamic neurons and olfactory granule cells. In the			
	brain, Contactin-3 is expressed in frontal lobe, occipital lobe, cerebellum and amygdala.			
	Contactin-3 contains 4 fibronectin type-III domains and 6 Ig-like C2-type (immunoglobulin-like)			
	domains. Human Contactin-3 shares 92 % aa identity with mouse Contactin-3.The exact			
	function of Contactin-3 is unclear. Contactin-3 may mediate cell-cell interaction and may			
	promote neurite outgrowth.			
	Synonym: CNTN3			
Molecular Weight:	134.8 kDa			
NCBI Accession:	NP_062202			
Application Details				
Restrictions:	For Research Use only			
Handling				
Format:	Lyophilized			
Reconstitution:	Please refer to the printed manual for detailed information.			
Buffer:	Lyophilized from sterile PBS, pH 7.4			
Storage:	4 °C,-20 °C,-80 °C			
Storage Comment:	Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80°C.			
	Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of reconstituted			

samples are stable at < -20°C for 3 months.
