Datasheet for ABIN735027 anti-IL-11 antibody (AA 22-120) (Cy5)

antibodies.com

Overview

| Quantity:            | 100 µL   |
|----------------------|--|
| Target:              | IL-11 (IL11)   |
| Binding Specificity: | AA 22-120  |
| Reactivity:          | Mouse, Rat   |
| Host:                | Rabbit   |
| Clonality:           | Polyclonal   |
| Conjugate:           | This IL-11 antibody is conjugated to Cy5   |
| Application:         | Western Blotting (WB), Immunofluorescence (Cultured Cells) (IF (cc)), Immunofluorescence (Paraffin-embedded Sections) (IF (p)) |

## Product Details

| Immunogen:            | KLH conjugated synthetic peptide derived from human IL-11 |
|-----------------------|---|
| lsotype:              | lgG   |
| Cross-Reactivity:     | Mouse, Rat  |
| Predicted Reactivity: | Human,Dog,Cow,Pig,Guinea Pig                              |
| Purification:         | Purified by Protein A.                                    |
| Target Details        |   |
| Target:               | IL-11 (IL11)  |
| Alternative Name:     | II-11 (IL11 Products)                                     |

| Target Details      |   |
|---------------------|---|
| Background:         | Synonyms: Interleukin-11, Adipogenesis inhibitory factor, AG, IL 11, IL11, Interleukin 11,                  |
|                     | Oprelvekin, IL11_HUMAN.   |
|                     | Background: Interleukin 11 is a pleiotropic cytokine produced by mesenchymal-derived                        |
|                     | adherent cells. IL11 shares many functions of IL6 and LIF, including potentiation of                        |
|                     | megakaryocyte activity, enhancement of human myeloma cell proliferation, and enhancement                    |
|                     | of hepatic acute phase protein production.Interleukin 11 directly stimulates the proliferation of           |
|                     | hematopoietic stem cells and megakaryocyte progenitor cells, and induces megakaryocyte                      |
|                     | maturation resulting in increased platelet production. Clinically it is used to prevent severe              |
|                     | thrombocytopenia and the reduction of the need for platelet transfusion following                           |
|                     | myelosuppressive chemotherapy.  |
| Gene ID:            | 3589  |
| UniProt:            | P20809  |
| Pathways:           | JAK-STAT Signaling, Negative Regulation of Hormone Secretion  |
| Application Details |   |
| Application Notes:  | IF(IHC-P) 1:50-200  |
|                     | IF(IHC-F) 1:50-200  |
|                     | IF(ICC) 1:50-200  |
| Restrictions:       | For Research Use only   |
| Handling            |   |
| Format:             | Liquid  |
| Concentration:      | 1 μg/μL   |
| Buffer:             | Aqueous buffered solution containing 0.01M TBS ( pH 7.4) with 1 % BSA, 0.03 % Proclin300 and 50 % Glycerol. |
| Preservative:       | ProClin   |
| Precaution of Use:  | This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be                         |
|                     | handled by trained staff only.  |
| Storage:            | -20 °C  |
| Storage Comment:    | Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.                           |
| Expiry Date:        | 12 months   |
|                     |   |
