Datasheet for ABIN736420

anti-TBPL1 antibody (AA 301-400) (Biotin)

-online.com antibodies

## A Constant of the second sec

Overview

Quantity:	100 μL
Target:	TBPL1
Binding Specificity:	AA 301-400
Reactivity:	Human, Mouse
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This TBPL1 antibody is conjugated to Biotin
Application:	Western Blotting (WB), ELISA, Immunohistochemistry (Paraffin-embedded Sections) (IHC (p)), Immunohistochemistry (Frozen Sections) (IHC (fro))

## Product Details

Immunogen:	KLH conjugated synthetic peptide derived from human TRF2
lsotype:	lgG
Cross-Reactivity:	Human, Mouse
Predicted Reactivity:	Rat,Dog,Pig,Rabbit
Purification:	Purified by Protein A.
Target Details	
Target:	TBPL1
Alternative Name:	TRF2 (TBPL1 Products)

Background:	Synonyms: TRF2, TRBF2, Telomeric repeat-binding factor 2, TTAGGG repeat-binding factor 2,
Dackground.	Telomeric DNA-binding protein, TERF2
	Background: Binds the telomeric double-stranded 5'-TTAGGG-3' repeat and plays a central role
	in telomere maintenance and protection against end-to-end fusion of chromosomes. In addition
	to its telomeric DNA-binding role, required to recruit a number of factors and enzymes required
	for telomere protection, including the shelterin complex, TERF2IP/RAP1 and DCLRE1B/Apollo.
	Component of the shelterin complex (telosome) that is involved in the regulation of telomere
	length and protection. Shelterin associates with arrays of double-stranded 5'-TTAGGG-3'
	repeats added by telomerase and protects chromosome ends, without its protective activity,
	telomeres are no longer hidden from the DNA damage surveillance and chromosome ends are
	inappropriately processed by DNA repair pathways. Together with DCLRE1B/Apollo, plays a key
	role in telomeric loop (T loop) formation by generating 3' single-stranded overhang at the
	leading end telomeres: T loops have been proposed to protect chromosome ends from
	degradation and repair. Required both to recruit DCLRE1B/Apollo to telomeres and activate the
	exonuclease activity of DCLRE1B/Apollo. Preferentially binds to positive supercoiled DNA.
	Together with DCLRE1B/Apollo, required to control the amount of DNA topoisomerase (TOP1,
	TOP2A and TOP2B) needed for telomere replication during fork passage and prevent aberrant
	telomere topology. Recruits TERF2IP/RAP1 to telomeres, thereby participating in to repressing
	homology-directed repair (HDR), which can affect telomere length.
Gene ID:	7014
UniProt:	Q15554
Application Details	
Application Notes:	WB 1:300-5000
	IHC-P 1:200-400
	IHC-F 1:100-500
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Concentration:	1 μg/μL
Buffer:	Aqueous buffered solution containing 0.01M TBS ( pH 7.4) with 1 % BSA, 0.03 % Proclin300 and
	50 % Glycerol.

## Handling

Preservative:	ProClin
Precaution of Use:	This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only.
Storage:	-20 °C
Storage Comment:	Store at -20°C for 12 months.
Expiry Date:	12 months
