Target Details

Target:	MHC, Class I
Alternative Name:	MHC Class I (MHC, Class I Products)
Background:	HLA class I histocompatibility,HLA A,HLA B,Major histocompatibility complex (MHC) molecules form an integral part of the immune response system. They are cell-surface receptors that bind peptides and present them to T lymphocytes. HLA-A, -B and -C encode membrane anchored heavy chains which heterodimerize with a light chain (b-2-Microglobulin) to form MHC-I. Polymorphisms yield hundreds of HLA-A, -B and -C alleles.
