	Background: ZNF217 (Zinc-finger protein 217) is a Kruppel-like zinc-finger protein which		
	functions as a transcriptional repressor protein and forms a complex with a number of proteins		
	including CoREST, BHC110/LSD1, HDAC2 and CtBP1. ZNF217 has been shown to repress E-		
	cadherin promoter activity. ZNF217 is overexpressed in a number of cancers including breast		
	and ovarian. ZNF217 and its associated proteins have been implicated in a novel pathway that		
	is involved in cancer progression.
