## Overview

|              |                                               |
|--------------|-----------------------------------------------|
| Quantity:    | 100 µL                                        |
| Target:      | eIF4EBP1 (EIF4EBP1)                           |
| Reactivity:  | Human, Mouse, Rat, Cow, Dog                   |
| Host:        | Rabbit                                        |
| Clonality:   | Polyclonal                                    |
| Conjugate:   | This eIF4EBP1 antibody is conjugated to Cy5.5 |
| Application: | Western Blotting (WB)                         |

## Product Details

|                   |                                                            |
|-------------------|------------------------------------------------------------|
| Immunogen:        | KLH conjugated synthetic peptide derived from human 4E-BP1 |
| Isotype:          | IgG                                                        |
| Specificity:      | 60-70 % sequence similarity to 4EBP2                       |
| Cross-Reactivity: | Human, Mouse, Rat                                          |
| Purification:     | Purified by Protein A.                                     |

## Target Details

|                   |                                                                                                                                                                                               |
|-------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Target:           | eIF4EBP1 (EIF4EBP1)                                                                                                                                                                           |
| Alternative Name: | eIF4EBP1/4EBP1 ( <a href="#">EIF4EBP1 Products</a> )                                                                                                                                          |
| Background:       | Synonyms: e4EBP1, Eukaryotic translation initiation factor 4E binding protein 1, Eukaryotic translation initiation factor 4E-binding protein 1, 4E BP1, 4EBP1, BP 1, BP1, e4E binding protein |

## Target Details

1, e4E-binding protein 1, Eukaryotic translation initiation factor 4E binding protein 1, MGC4316, PHAS I, PHASI, PHAS-I, PHAS, 4E-BP1, Phosphorylated heat- and acid-stable protein regulated by insulin 1, Phosphorylated heat and acid stable protein regulated by insulin 1, 4EBP1\_HUMAN. Background: This gene encodes one member of a family of translation repressor proteins. The protein directly interacts with eukaryotic translation initiation factor 4E (eIF4E), which is a limiting component of the multisubunit complex that recruits 40S ribosomal subunits to the 5' end of mRNAs. Interaction of this protein with eIF4E inhibits complex assembly and represses translation. This protein is phosphorylated in response to various signals including UV irradiation and insulin signaling, resulting in its dissociation from eIF4E and activation of mRNA translation. [provided by RefSeq, Jul 2008].

|           |                                                                                                                                                                                                                |
|-----------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Gene ID:  | 1978                                                                                                                                                                                                           |

## Application Details

|                    |                                                                                            |
|--------------------|--------------------------------------------------------------------------------------------|
| Application Notes: | IF(IHC-P)(1:100-500)<br>Optimal working dilution should be determined by the investigator. |
| Restrictions:      | For Research Use only                                                                      |

## Handling

|                    |                                                                                                                        |
|--------------------|------------------------------------------------------------------------------------------------------------------------|
| Format:            | Liquid                                                                                                                 |
| Concentration:     | 1 µg/µL                                                                                                                |
| Buffer:            | Aqueous buffered solution containing 0.01M TBS ( pH 7.4) with 1 % BSA, 0.03 % Proclin300 and 50 % Glycerol.            |
| Preservative:      | Sodium azide                                                                                                           |
| Precaution of Use: | This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only. |
| Storage:           | -20 °C                                                                                                                 |
| Storage Comment:   | Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.                                      |
| Expiry Date:       | 12 months                                                                                                              |
