	Background: Dectin 2 is a type II transmembrane protein that is a member of the C type lectin
	superfamily. In mouse, dectin 2 is predominantly expressed on tissue macrophages and some
	dendritic cells. Significant expression of Dectin 2 has been reported on macrophages in the red
	pulp and marginal zones of the spleen, kupffer cells in the liver and alveolar macrophages in the
	lung. Peripheral blood monocytes express low levels of dectin 2 but transient up regulation of
	expression has been demonstrated on monocytes at sites of inflammation. The function of
	dectin 2 has not been fully determined but studies suggest a possible role in immune
	surveillance.
