| Comment:            | The thermal stability is described by the loss rate. The loss rate was determined by accelerated |
|                     | thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious          |
|                     | degradation and precipitation were observed. The loss rate is less than 5% within the expiration |
|                     | date under appropriate storage condition.  |
