Product Details

Purpose:	Goat anti-Horse IgA Heavy Chain Antibody Affinity Purified
Isotype:	IgG
Cross-Reactivity (Details):	By immunoelectrophoresis, the antiserum reacts specifically with dog IgA. No antibody was detected against immunoglobulin light chains or non-immunoglobulin serum proteins. This antibody may cross react with IgA from other species.
Characteristics:	IgA is an immunoglobulin that is typically dimeric and held together by a J-chain protein, and can be found in a secreted, monomeric form. Anti-heavy chain antibodies are designed to react with only the heavy chain of the Ig molecule and remove reactivity to the light chain.
Purification:	Affinity Purified
