Target Details

Target: C2CD5/KIAA0528 (C2CD5)

Alternative Name: KIAA0528 ([C2CD5 Products](#))

Background: KIAA0528 is a protein that was first identified in the in silico analysis of long cDNAs isolated in the Kazusa cDNA sequencing project. The function of KIAA0528 has not been characterized. By similarity KO528 contains a C2 domain, a domain that is found in proteins that bind phospholipids. The C2 domain is also present in a family of proteins involved in synaptic vesicle trafficking, thus, the function of KIAA0528 is predicted to be involved in intracellular transport.
