Target Details

Alternative Name:	SFRS2IP (SCAF11 Products)

Target Details

Background: Background: SFRS2IP was identified as factor that interacts with SC35, an SR family member critical to mRNA splicing. SFRS2IP contains an arginine-serine-rich (RS) domain and lacks any known RNA-binding motifs. SFRS2IP may have an important role in spliceosome assembly since it has been demonstrated to interact with several proteins involved in the early steps of spliceosome assembly and the finding that spliceosomal complexes A and B are not formed in SFRS2IP depleted extracts.
