## Target Details

Target:	RCOR3
Alternative Name:	RCOR3 ( <a href="#">RCOR3 Products</a> )
Background:	Background: RCOR3 is a member of the coREST family that functions as a co-repressor for REST (RE1-silencing transcription factor) to regulate neuronal gene expression and neuronal stem cell fate. The coREST family includes RCOR1, also known as coREST, RCOR2, and RCOR3. REST complexes regulate gene expression by modifying chromatin to create a repressive epigenetic environment.
