**anti-Golgin A3 antibody (AA 1448-1498)**[Go to Product page](#)

## Overview

|                      |                                                 |
|----------------------|-------------------------------------------------|
| Quantity:            | 100 µg                                          |
| Target:              | Golgin A3 (GOLGA3)                              |
| Binding Specificity: | AA 1448-1498                                    |
| Reactivity:          | Human                                           |
| Host:                | Rabbit                                          |
| Clonality:           | Polyclonal                                      |
| Conjugate:           | This Golgin A3 antibody is un-conjugated        |
| Application:         | Western Blotting (WB), Immunoprecipitation (IP) |

## Product Details

|               |                                                    |
|---------------|----------------------------------------------------|
| Purpose:      | Rabbit anti-Golgin-160 Antibody, Affinity Purified |
| Immunogen:    | between AA 1448 and 1498                           |
| Isotype:      | IgG                                                |
| Purification: | Affinity Purified                                  |

## Target Details

|                   |                                                                                                                                                                                                  |
|-------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Target:           | Golgin A3 (GOLGA3)                                                                                                                                                                               |
| Alternative Name: | Golgin-160 ( <a href="#">GOLGA3 Products</a> )                                                                                                                                                   |
| Background:       | Background: Golgin-160 belongs to the golgin family of proteins which localize to the Golgi.<br>Golgin-160 has been postulated to play roles in the stacking of Golgi cisternae and in vesicular |

## Target Details

|                 |                                                          |
|-----------------|----------------------------------------------------------|
|                 | transport [taken from NCBI Entrez Gene (Gene ID: 2802)]. |
| Gene ID:        | 2802                                                     |
| NCBI Accession: | <a href="#">NP_005886</a>                                |
| UniProt:        | <a href="#">Q08378</a>                                   |
| Pathways:       | <a href="#">SARS-CoV-2 Protein Interactome</a>           |

## Application Details

|                    |                                                   |
|--------------------|---------------------------------------------------|
| Application Notes: | IP: 2 - 10 µg/mg lysate<br>WB: 1:2,000 - 1:10,000 |
| Restrictions:      | For Research Use only                             |

## Handling

|                    |                                                                                                                        |
|--------------------|------------------------------------------------------------------------------------------------------------------------|
| Concentration:     | 1000 µg/mL                                                                                                             |
| Buffer:            | Tris-citrate/phosphate buffer, pH 7 to 8 containing 0.09 % Sodium Azide                                                |
| Preservative:      | Sodium azide                                                                                                           |
| Precaution of Use: | This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only. |
| Storage:           | 4 °C                                                                                                                   |
| Expiry Date:       | 12 months                                                                                                              |
