Target Details

Target:	EXOSC4
Alternative Name:	EXOSC4 (EXOSC4 Products)
Background:	Background: Exosome component 4 (EXOSC4) is a non-catalytic component of the RNA

Target Details

exosome complex which has 3'->5' exoribonuclease activity and participates in a multitude of cellular RNA processing and degradation events. In the nucleus, the RNA exosome complex is involved in proper maturation of stable RNA species such as rRNA, snRNA and snoRNA, in the elimination of RNA processing by-products and non-coding 'pervasive' transcripts, such as antisense RNA species and promoter-upstream transcripts (PROMPTs), and of mRNAs with processing defects, thereby limiting or excluding their export to the cytoplasm [taken from the Universal Protein Resource (UniProt) Q9NPD3].
