Target Details

Target:	DDX54
Alternative Name:	DDX54 (DDX54 Products)
Background:	Background: DDX54 is a member of the DEAD box family of proteins that possesses several conserved motifs which include the highly conserved DEAD (Asp-Glu-Ala-Asp) amino acid

Target Details

sequence motif. The major activity of DEAD box proteins is to function as ATP-dependent RNA helicases. As helicases, DEAD proteins play an important role in all aspects of RNA metabolism and function which include pre-mRNA splicing, RNA synthesis, RNA degradation, RNA export, RNA translation, RNA secondary structure formation, ribosome biogenesis, and the assembly of RNP complexes. DDX54 has been shown to interact with nuclear hormone receptors in a hormone -dependent manner and repress their transcriptional activity.
