Immunogen:	between AA 1 and 50
Isotype:	IgG
Purification:	Affinity Purified

Target Details

Target:	TCEA3
Alternative Name:	TFIIS (TCEA3 Products)
Background:	Background: Transcription elongation factor S-II protein 2 (TFIIS) is necessary for efficient RNA

Target Details

polymerase II transcription elongation past template-encoded arresting sites. The arresting sites in DNA have the property of trapping a certain fraction of elongating RNA polymerases that pass through, resulting in locked ternary complexes. Cleavage of the nascent transcript by S-II allows the resumption of elongation from the new 3'-terminus [taken from the Universal Protein Resource (UniProt) Q15560].
