## Target Details

Target:	CD300a (CD300A)
Alternative Name:	CD300A ( <a href="#">CD300A Products</a> )

## Target Details

Background:	CD300a is an inhibitory receptor for mast cells and eosinophils in allergic inflammation (AI), however, the spatiotemporal expression of CD300a and its potential roles in the resolution of AI are still to be determined. CD300a expression on peritoneal cells is regulated from inflammation to resolution. CD300a activation on mouse bone marrow-derived mast cells regulated ALX/FPR2 expression levels following IgE-mediated activation.
Molecular Weight:	18.73 kDa. Due to glycosylation, the protein migrates to 45-50 kDa based on Tris-Bis PAGE result.
