Target Details

Target:	TIMELESS
Alternative Name:	Timeless (TIMELESS Products)
Background:	Background: Timeless was first identified in Drosophila as a transcriptional regulator involved in

Target Details

the fly circadian rhythm. In mice, humans and yeast, the homologs of drosophila timeless have been observed to play a role in the DNA damage checkpoint response. Human timeless has been shown to interact with the circadian clock protein cryptochrome 2 as well as the DNA checkpoint proteins Chk1 and the ATR-ATRIP complex suggesting a link between circadian rhythm and the cell cycle.
