## Overview

|                      |                                                                                                                              |
|----------------------|------------------------------------------------------------------------------------------------------------------------------|
| Quantity:            | 20 µg                                                                                                                        |
| Target:              | SLTM                                                                                                                         |
| Binding Specificity: | AA 800-850                                                                                                                   |
| Reactivity:          | Human                                                                                                                        |
| Host:                | Rabbit                                                                                                                       |
| Clonality:           | Polyclonal                                                                                                                   |
| Application:         | Western Blotting (WB), Immunoprecipitation (IP), Immunohistochemistry (Formalin-fixed Paraffin-embedded Sections) (IHC (fp)) |

## Product Details

|               |                                              |
|---------------|----------------------------------------------|
| Purpose:      | Rabbit anti-SLTM Antibody, Affinity Purified |
| Immunogen:    | between AA 800 and 850                       |
| Isotype:      | IgG                                          |
| Purification: | Affinity Purified                            |

## Target Details

|                   |                                                                                                                                                                                                                                                                                       |
|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Target:           | SLTM                                                                                                                                                                                                                                                                                  |
| Alternative Name: | SLTM ( <a href="#">SLTM Products</a> )                                                                                                                                                                                                                                                |
| Background:       | Background: SLTM (SAFB-like transcriptional modulator) is part of a protein family that includes at least two other family members, SAFB1 (scaffold attachment factor B1) and SAFB2 (scaffold attachment factor B2). Like SAFB1, SLTM is implicated to play a role in transcriptional |

## Target Details

|                 |                           |
|-----------------|---------------------------|
|                 | repression and apoptosis. |
| Gene ID:        | 79811                     |
| NCBI Accession: | <a href="#">NP_079031</a> |
| UniProt:        | <a href="#">Q9NWH9</a>    |

## Application Details

|                    |                                                                                                                                                                 |
|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Application Notes: | IHC: 1:200 - 1:1,000. Epitope retrieval with citrate buffer pH 6.0 is recommended for FFPE tissue sections.<br>IP: 2 - 5 µg/mg lysate<br>WB: 1:2,000 - 1:10,000 |
| Restrictions:      | For Research Use only                                                                                                                                           |

## Handling

|                    |                                                                                                                        |
|--------------------|------------------------------------------------------------------------------------------------------------------------|
| Concentration:     | 200 µg/mL                                                                                                              |
| Buffer:            | Tris-buffered Saline containing 0.1 % BSA and 0.09 % Sodium Azide                                                      |
| Preservative:      | Sodium azide                                                                                                           |
| Precaution of Use: | This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only. |
| Storage:           | 4 °C                                                                                                                   |
| Expiry Date:       | 12 months                                                                                                              |
