| Overview        |  |
|-----------------|--|
| Quantity:       | 50 tests                                 |
| Target:         | CD161 (KLRB1)                            |
| Reactivity:     | Rat                                      |
| Host:           | Mouse                                    |
| Clonality:      | Monoclonal                               |
| Conjugate:      | This CD161 antibody is conjugated to APC |
| Application:    | Flow Cytometry (FACS)                    |
|                 |  |

| Clana           | 2 0 0                                    |

| Clone:   | 3-2-3       |
|----------|-------------|
| Isotype: | IgG1, kappa |

## Target Details

| Target:           | CD161 (KLRB1)  |
|-------------------|--|
| Alternative Name: | CD161 (KLRB1 Products)   |
| Background:       | NKR-P1, CD161a/CD161b, NKR-P1a/KLRB1a,CD161 is a 30 kD type II transmembrane C-type                  |
|                   | lectin, expressed as a homodimer. Rat NKR-P1 receptors are primarily expressed on NK cells, a        |
|                   | subset of T cells, dendritic cells, and activated monocytes. There are three different types of      |
|                   | NKR-P in rat, namely NKR-P1a, NKR-P1b, and NKR-P1c. NKR-P1a does not contain an ITIM                 |
|                   | structure and is an activating receptor, while NKR-P1b contains an ITIM and displays inhibitory      |
|                   | function. LLT-1 (ligand lectin like transcript 1) is the ligand, while KLR (killer cell lectin like) |

## **Target Details**

Storage Comment:

| Target Details      |   |  |
|---------------------|---|--|
|                     | functions as a receptor.  |  |
| Gene ID:            | 362443  |  |
| UniProt:            | P27471, A4KWA1, Q5NKN4, Q5NKN2  |  |
| Application Details |   |  |
| Application Notes:  | The amount of the reagent is suggested to be used 5 $\mu$ L of antibody per test (million cells in 100 $\mu$ L staining volume or per 100 $\mu$ L of whole blood). Check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use. |  |
| Comment:            | Matching Isotype Control: APC Mouse IgG1, κ Isotype Control[MOPC-21] (ABIN7469762)  |  |
| Restrictions:       | For Research Use only   |  |
| Handling            |   |  |
| Buffer:             | PBS with 0.05 % Proclin300, 1 % Protein protectant  |  |
| Preservative:       | ProClin   |  |
| Precaution of Use:  | This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.   |  |
| Storage:            | 4 °C  |  |
|                     |   |  |

Store at 2~8°C and protected from prolonged exposure to light. Do not freeze.
