Target Details

Target:	STK10-A
Alternative Name:	serine/threonine kinase 10 (STK10-A Products)

Target Details

Background:	Serine/threonine kinase 10 , LOK , PRO2729,This gene encodes a member of the Ste20 family of serine/threonine protein kinases, and is similar to several known polo-like kinase kinases. The protein can associate with and phosphorylate polo-like kinase 1, and overexpression of a kinase-dead version of the protein interferes with normal cell cycle progression. The kinase can also negatively regulate interleukin 2 expression in T-cells via the mitogen activated protein kinase kinase 1 pathway. [provided by RefSeq]
