Target Details

Target:	SYTL4
Alternative Name:	synaptotagmin like 4 (SYTL4 Products)
Background:	Synaptotagmin like 4 , SLP4, This gene encodes a member of the synaptotagmin like protein family. Members of this family are characterized by an N-terminal Rab27 binding domain and C-terminal tandem C2 domains. The encoded protein binds specific small Rab GTPases and is

involved in intracellular membrane trafficking. This protein binds Rab27 and may be involved in inhibiting dense core vesicle exocytosis. Alternate splicing results in multiple transcript variants that encode the same protein. [provided by RefSeq]
