## **Target Details**

l arget Details		
	gene encodes a protein that contains a ubiquitin associated domain at the N-terminus, an SH3 domain, and a C-terminal domain with similarities to the catalytic motif of phosphoglycerate	
	mutase. The encoded protein was found to inhibit endocytosis of epidermal growth factor	
	receptor (EGFR) and platelet-derived growth factor receptor. [provided by RefSeq]	
Molecular Weight:	73 kDa	
Gene ID:	84959	
UniProt:	Q8TF42
