Target Details

Target:	Density Regulated Protein (DENR)
Alternative Name:	density regulated re-initiation and release factor (DENR Products)
Background:	Synonyms: density regulated re-initiation and release factor , DRP , DRP1 , SMAP-3 Background: This gene encodes a protein whose expression was found to increase in cultured

Target Details

cells at high density but not during growth arrest. This gene was also shown to have increased expression in cells overexpressing HER-2/neu proto-oncogene. The protein contains an SUI1 domain. In budding yeast, SUI1 is a translation initiation factor that along with eIF-2 and the initiator tRNA-Met, directs the ribosome to the proper translation start site. Proteins similar to SUI have been found in mammals, insects, and plants. [provided by RefSeq]
