Target Details

Target:	NDC80
Alternative Name:	NDC80 kinetochore complex component (NDC80 Products)
Background:	Synonyms: NDC80 kinetochore complex component , HEC , HEC1 , HsHec1 , KNTC2 , TID3 ,

Target Details

hsNDC80

Background: This gene encodes a component of the NDC80 kinetochore complex. The encoded protein consists of an N-terminal microtubule binding domain and a C-terminal coiled-coiled domain that interacts with other components of the complex. This protein functions to organize and stabilize microtubule-kinetochore interactions and is required for proper chromosome segregation. [provided by RefSeq, Oct 2011]
