Target Details

Target:	POLR2C
Alternative Name:	RNA polymerase II subunit C (POLR2C Products)
Background:	Synonyms: RNA polymerase II subunit C , RPB3 , RPB31 , hRPB33 , hsRPB3 Background: This gene encodes the third largest subunit of RNA polymerase II, the polymerase

Target Details

responsible for synthesizing messenger RNA in eukaryotes. The product of this gene contains a cysteine rich region and exists as a heterodimer with another polymerase subunit, POLR2J. These two subunits form a core subassembly unit of the polymerase. A pseudogene has been identified on chromosome 21. [provided by RefSeq]
