Target Details

Target:	PUM2
Alternative Name:	pumilio RNA binding family member 2 (PUM2 Products)
Background:	Synonyms: pumilio RNA binding family member 2 , PUMH2 , PUML2

Target Details

Background: Sequence-specific RNA-binding protein that regulates translation and mRNA stability by binding the 3'-UTR of mRNA targets. Its interactions and tissue specificity suggest that it may be required to support proliferation and self-renewal of stem cells by regulating the translation of key transcripts.
