Target Details

Target:	SEC14L2
Alternative Name:	SEC14 like lipid binding 2 (SEC14L2 Products)
Background:	Synonyms: SEC14 like lipid binding 2 , C22orf6 , SPF , TAP , TAP1 Background: This gene encodes a cytosolic protein which belongs to a family of lipid-binding

Target Details

proteins including Sec14p, alpha-tocopherol transfer protein, and cellular retinol-binding protein. The encoded protein stimulates squalene monooxygenase which is a downstream enzyme in the cholesterol biosynthetic pathway. Alternatively spliced transcript variants encoding different isoforms have been identified for this gene. [provided by RefSeq]
