Datasheet for ABIN7478306

anti-Neisseria Meningitidis antibody (Biotin)

Go to Product page

Overview

Quantity:	1 mL
Target:	Neisseria Meningitidis
Reactivity:	Neisseria meningitidis
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This Neisseria Meningitidis antibody is conjugated to Biotin
Application:	Western Blotting (WB), ELISA, Immunohistochemistry (IHC), Fluorescence Microscopy (FM)

Product Details

Immunogen:	whole cell prep. of N. meningitidis types A, B & C
Isotype:	IgG
Specificity:	All antigens
Cross-Reactivity (Details):	This antiserum has not been absorbed and may react with related microorganisms, Reactive with serogroups A, B & C. Other serogroups not tested.
Purification:	This product consists of purified IgG fraction of the above antiserum covalently coupled with the N-Hydroxysuccinimide ester of biotin under mild conditions to give a high degree of substitution.

Target Details

Target:	Neisseria Meningitidis
Abstract:	Neisseria Meningitidis Products

Target Details

Target Type:	Bacteria

Application Details

Application Notes:	TITER : >1:1,000 by indirect IFA, Possible applications for this product include avidin and streptavidin amplification systems for immunohistochemistry, ELISA, fluorescence microscopy and immunoblotting. In addition, this product may be used in place of neat antiserum in almost any appropriate antibody-based technique.
Restrictions:	For Research Use only

Handling

Format:	Liquid
Concentration:	Lot specific
Buffer:	The product is formulated in a phosphate saline buffer (0.01M, pH 7.2) containing 0.1 % sodium azide preservative. No stabilizing proteins have been added.
Preservative:	Sodium azide
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.
Storage:	4 °C,-20 °C
Storage Comment:	Recommended short term (<6 months) storage is liquid at 2-8°C. For longer term storage, aliquot and freeze.
