# Datasheet for ABIN7478932 Butyrylcholinesterase Protein (BCHE) (AA 1-141, full length) (His tag)

2 Images

Overview

| 01011000                      |  |
|-------------------------------|--|
| Quantity:                     | 100 µg   |
| Target:                       | Butyrylcholinesterase (BCHE)   |
| Protein Characteristics:      | AA 1-141, full length  |
| Origin:                       | Dog  |
| Source:                       | Yeast  |
| Protein Type:                 | Recombinant  |
| Purification tag / Conjugate: | This Butyrylcholinesterase protein is labelled with His tag.                                     |
| Application:                  | ELISA  |
| Product Details               |  |
| Sequence:                     | NTDQSFPGFP GSEMWNPNTD LSEDCLYLNV WIPTPKPKNA TVMIWIYGGG FQTGTSSLPV                                |
|                               | YDGKFLARVE RVIVVSVNYR VGALGFLALP GNPEAPGNLG LFDQQLALQW VQKNIAAFGG                                |
|                               | NPKSVTLFGE SAGAGSVGLH L  |
| Specificity:                  | Canis familiaris (Dog) (Canis lupus familiaris)  |
| Characteristics:              | Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalier |
|                               | cells or by baculovirus infection. Be aware about differences in price and lead time.            |
| Purity:                       | > 90 %   |
| Target Details                |  |
| Target:                       | Butyrylcholinesterase (BCHE)   |
| Alternative Name:             | Cholinesterase (BCHE) (BCHE Products)  |

### Target Details

| Background:       | Recommended name: Cholinesterase.  |
|-------------------|--|
|                   | EC= 3.1.1.8.   |
|                   | Alternative name(s): Acylcholine acylhydrolase Butyrylcholine esterase Choline esterase II |
|                   | Pseudocholinesterase   |
| Molecular Weight: | 17.1 kD  |
| UniProt:          | P32750   |
| Pathways:         | Peptide Hormone Metabolism   |

#### **Application Details**

| Comment:      | The yeast protein expression system is the most economical and efficient eukaryotic system         |
|---------------|--|
|               | for secretion and intracellular expression. A protein expressed by the mammalian cell system is    |
|               | of very high-quality and close to the natural protein. But the low expression level, the high cost |
|               | of medium and the culture conditions restrict the promotion of mammalian cell expression           |
|               | systems. The yeast protein expression system serve as a eukaryotic system integrate the            |
|               | advantages of the mammalian cell expression system. A protein expressed by yeast system            |
|               | could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the     |
|               | native protein conformation. It can be used to produce protein material with high added value      |
|               | that is very close to the natural protein. Our proteins produced by yeast expression system has    |
|               | been used as raw materials for downstream preparation of monoclonal antibodies.                    |
| Restrictions: | For Research Use only  |

## Handling

| Format:          | Lyophilized   |
|------------------|---|
| Concentration:   | 0.2-2 mg/mL   |
| Buffer:          | Tris-based buffer, 50 % glycerol  |
| Handling Advice: | Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week |
| Storage:         | -20 °C  |
| Storage Comment: | Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.                                |
