## Datasheet for ABIN7479361 Proteoglycan 4 Protein (PRG4) (partial) (His tag)

Overview

Overview	
Quantity:	100 µg
Target:	Proteoglycan 4 (PRG4)
Protein Characteristics:	partial
Origin:	Human
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This Proteoglycan 4 protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	AIGPSQTHTI RIQYSPARLA YQDKGVLHNE VKVSILWRGL PNVVTSAISL PNIRKPDGYD
	YYAFSKDQYY NIDVPSRTAR AITTRSGQTL SKVWYNCP
Specificity:	Homo sapiens (Human)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %
Target Details	
Target:	Proteoglycan 4 (PRG4)
Abstract:	PRG4 Products

Target Details	
Background:	Recommended name: Proteoglycan 4.
	Alternative name(s): Lubricin Megakaryocyte-stimulating factor Superficial zone proteoglycan
	Cleaved into the following chain: 1.
	Proteoglycan 4 C-terminal part
UniProt:	Q92954
Application Details	
Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system
	for secretion and intracellular expression. A protein expressed by the mammalian cell system is

of very high-quality and close to the natural protein. But the low expression level, the high cost

of medium and the culture conditions restrict the promotion of mammalian cell expression

systems. The yeast protein expression system serve as a eukaryotic system integrate the

advantages of the mammalian cell expression system. A protein expressed by yeast system

could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the

native protein conformation. It can be used to produce protein material with high added value

that is very close to the natural protein. Our proteins produced by yeast expression system has

Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to

been used as raw materials for downstream preparation of monoclonal antibodies.

For Research Use only

Tris-based buffer, 50 % glycerol

Lyophilized

0.2-2 mg/mL

one week
