Datasheet for ABIN7479432

CGA Protein (AA 25-120) (His tag)

Go to Product page

Overview

Quantity:	100 µg
Target:	CGA
Protein Characteristics:	AA 25-120
Origin:	Dog
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This CGA protein is labelled with His tag.
Application:	ELISA

Product Details

Sequence:	FPDGEF TMQGCPECKL KENKYFSKLG APIYQCMGCC FSRAYPTPAR SKKTMLVPKN ITSEATCCVA KAFTKATVMG NAKVENHTEC HCSTCYYHKS
Specificity:	Canis familiaris (Dog) (Canis lupus familiaris)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	CGA
Alternative Name:	Glycoprotein Hormones alpha Chain (CGA) (CGA Products)

Target Details

Background:	Recommended name: Glycoprotein hormones alpha chain. Alternative name(s): Anterior pituitary glycoprotein hormones common subunit alpha Follicle-stimulating hormone alpha chain. Short name= FSH-alpha Follitropin alpha chain Luteinizing hormone alpha chain. Short name= LSH-alpha Lutropin alpha chain Thyroid-stimulating hormone alpha chain. Short name= TSH-alpha Thyrotropin alpha chain
UniProt:	Q9XSW8
Pathways:	Metabolism of Steroid Hormones and Vitamin D, Thyroid Hormone Synthesis, Hormone Transport, Peptide Hormone Metabolism

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
