Datasheet for ABIN7479511

Lipoyl synthase Protein (lipA) (AA 1-320) (His tag)

Overview

Quantity:	100 µg
Target:	Lipoyl synthase (lipA)
Protein Characteristics:	AA 1-320
Origin:	Bartonella henselae
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This Lipoyl synthase protein is labelled with His tag.
Application:	ELISA

Product Details

Sequence:	MVTVVDRVTD RRLRHPEKAH RPDTSVQKKP DWIRVKAPTS QVYKETHGIV RAHKLVTVCE EAGCPNIGEC WSQRHASFMI LGEICTRACA FCNVATGIPF AVDENEPERV ADAVARMELK HVVITSVDRD DLADGGAEHF AKVIYAIRRK APKTTIEVLT PDFRHKD GAL EIVVAAKPDV FNHNLETVPS KYLKVRPGAR YFHSIRLLQR VKELDPTIFT KSGIMVGLGE ERNEILQLMD DLRSADVDFM TIGQYLQPTR KHHPVIRFVP PEEFESFAKI GKVKGFLHMA SNPLTRSSH AGDDFAILQK ARDEKFALQR
Specificity:	Bartonella henselae (strain ATCC 49882 / Houston 1) (Rochalimaea henselae)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	Lipoyl synthase (lipA)
Abstract:	lipA Products
Background:	Recommended name: Lipoyl synthase. EC= 2.8.1.8. Alternative name(s): Lip-syn. Short name= LS Lipoate synthase Lipoic acid synthase Sulfur insertion protein LipA
UniProt:	Q6G401

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
