Datasheet for ABIN7482277

Recombinant anti-Rituximab antibody

Overview

Quantity:	100 µg
Target:	Rituximab
Reactivity:	Human
Host:	Mouse
Antibody Type:	Recombinant Antibody
Clonality:	Monoclonal
Application:	ELISA, Lateral Flow (LF)

Product Details

Purpose:	Anti-Rituximab Antibody (MALS verified)
Immunogen:	Anti-Rituximab Antibody (ABIN7482277) are expressed from human 293 cells (HEK293).
Characteristics:	Anti-idiotypic Antibodies
Grade:	MALS verified

Target Details

Target:	Rituximab
Abstract:	Rituximab Products
Target Type:	Antibody
Background:	Rituxan is a genetically engineered chimeric murine/human monoclonal antibody directed against the CD20 antigen found on the surface of normal and malignant B lymphocytes. The

Target Details

antibody is an IgG1 kappa immunoglobulin containing murine light- and heavy-chain variable region sequences and human constant region sequences. Rituximab is composed of two heavy chains of 451 amino acids and two light chains of 213 amino acids, Anti-Rituximab Antibodies (RIB-Y35c) is the monoclonal antibody of Rituximab expressed with human HEK293 cells.

Application Details

Application Notes: This antibody can be paired with other CD20 antibodies to detect CD20 in sandwich ELISA or LFA assay.

Restrictions: For Research Use only

Handling

Format: Lyophilized

Storage: -20 °C
