Datasheet for ABIN7482299

## Recombinant anti-SARS-CoV-2 Spike antibody (BA.4 – Omicron, BA.5 – Omicron)

### Overview

Quantity:	100 µg
Target:	SARS-CoV-2 Spike
Binding Specificity:	BA.4 – Omicron, BA.5 – Omicron
Reactivity:	SARS Coronavirus-2 (SARS-CoV-2), SARS CoV-2 Omicron
Host:	Mouse
Antibody Type:	Recombinant Antibody
Clonality:	Monoclonal
Conjugate:	This SARS-CoV-2 Spike antibody is un-conjugated
Application:	ELISA

### Product Details

Purpose:	Anti-SARS-CoV-2 Spike Antibody, Human IgG1 (9A5E10) (BA.4&BA.5/Omicron Specific) (MALS verified)
Clone:	9A5E10
Isotype:	IgG1
Characteristics:	Anti-SARS-CoV-2 Spike Antibody, Human IgG1 (9A5E10) (BA.4&BA.5/Omicron Specific) is isolated from a Spike protein infected Mouse and is recombinantly produced from human 293 cells (HEK293)
Grade:	MALS verified

## Target Details

---

Target: SARS-CoV-2 Spike

Alternative Name: SARS-CoV-2 Spike protein ([SARS-CoV-2 Spike Products](#))

Target Type: Viral Protein

Background: It's been reported that SARS-CoV-2 can infect the human respiratory epithelial cells through interaction with the human ACE2 receptor. The spike protein is a large type I transmembrane protein containing two subunits, S1 and S2. S1 mainly contains a receptor binding domain (RBD), which is responsible for recognizing the cell surface receptor. S2 contains basic elements needed for the membrane fusion. The S protein plays key parts in the induction of neutralizing-antibody and T-cell responses, as well as protective immunity.

## Application Details

---

Restrictions: For Research Use only

## Handling

---

Format: Lyophilized

Storage: -20 °C
